

**Hot cold and Normal water RO purifier
(10PLH wall mounting)**

Intro:

We offer to our clients' superior quality Hot & Cold Water Dispenser with Built-In RO System. Due to high quality and durability these Dispenser with Built-In RO System are famous among its user. Our products are highly appreciated by our clients in the market.

Technical Parameters of Hot & Cold Water Dispenser with RO:-

Style for Purifier: Wall Mounted

Flow Rate: 10 ltr / hr

Tank Capacity: Cold Water Tank – 1.1 Ltrs

Hot Water Tank -1.5 Ltrs

Normal water Tank: 8 Ltrs Extra Jar With Float Mechanism

Dimensions (mm): 365(L) X 370(W) X 1000 (H)

Power Consumption: 30 W (Stand by)

300 W (In Use)

Features:

- Wall Mounted
- No need of Pre filtration
- 4 Stage Inbuilt RO
- Separate switch control for Hot and Cold
- Easy Method for filter Replacement
- Dimension: 22 L * 9 W * 17 H Inches

Five cartridge filter combinations:

First level: 5 micron PP fiber: non-toxic and tasteless polypropylene particles, through heating and melting, spinning, traction, receiving molding material. Of raw water to remove sediment, suspended solids, colloids, iron embroidery, particulate filtration area and dirt holding capacity, good effect.

Second stage: Imported coconut shell activated carbon particles: absorption all kinds of residual contaminants, effective filtration of water color, odor, chlorine, chloroform and basic organic chemistry to make the water reach the odorless and colorless carbon rods by extrusion micro. hole trapping very fine particles, colloids, suspended solids and so on.

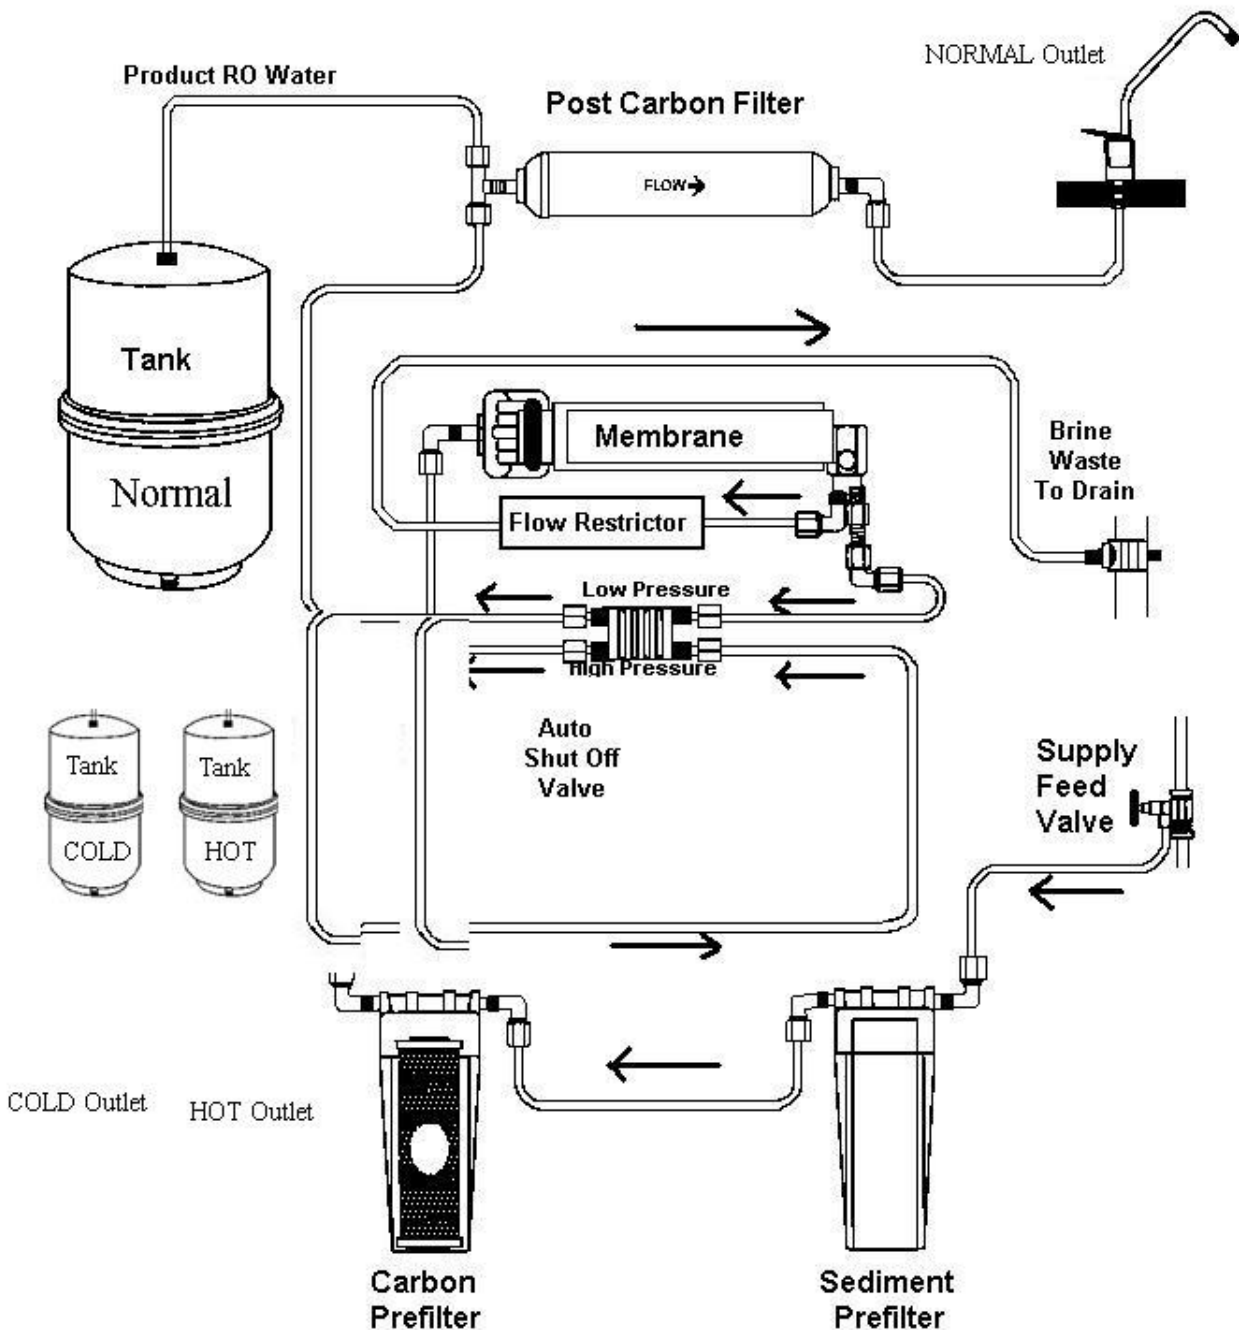

Third stage: Imported RO membrane: the complete removal of bacteria, viruses, E. coli and other impurities, filtration precision millionth microns;

Fourth Stage: activated carbon antibacterial calcification: further in-depth removal of odor, chlorine and bacteria, suppress bacteria regeneration, to prevent secondary pollution of drinking water, to ensure water quality fresh and delicious, resorted to water taste glycol.
